-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

1. Applicant's amendment received on August 20<sup>th</sup> 2004 has been fully considered and entered, but the arguments are not deemed to be persuasive.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-4, and 8-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Jung (US Patent no. 6412952) for the same reasons as previously set forth in the last office action mailed on May 19<sup>th</sup> 2004, paper no. 5.

Art Unit: 2613

Regarding claims 1-4, and 8-13, the applicant argues that in the analysis on Jung, there is no disclosure, teaching or suggestion of a mechanical coupling means for coupling the first and the second springs together. The examiner respectfully disagrees. Jung discloses not only the bracket 12 but also describes the combination of the springs along with the bracket in col. 2, lines 40-58. It should be noted that the examiner refers to the applicant's drawings in order to apply the prior art cited. A close look at the applicant's drawings will show more similarities between Jung and the applicant's drawings than there are differences. In fact, one skilled in the art would see no difference between the prior art and some of the claimed limitations. Any deviation would be considered as a design choice. It should be noted that while the examiner pointed only to Jung's spring 12, the entire disclosure of Jung is considered relevant to the claimed limitations since a detailed reading will show the similarities. Further, the examiner would urge the applicant to show the difference between both, the drawings of the prior art and the drawings of the application.

In addition, as previously indicated, Jung provides analogous securing means comprising of screws and bolts with retaining nut, resilient spacers, and resilient seal between the CRT and the coupler as disclosed in col. 2, lines 27-67. Further, providing tension bracket to be either symmetrical or not symmetrical is considered inherent in Jung as disclosed in col. 3, lines 12-65.

Art Unit: 2613

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gims S Philippe whose telephone number is (703) 305-1107. The examiner can normally be reached on M-F (9:30-7:00) Second Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris S Kelley can be reached on (703) 305-4780. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
